8. Headphones
9. Quadcopter Drone
10. Microscope
11. Telescope
12. Smartwatch
13. 3D Keyboard
14. Table Fan (Full 3D Model)
15. Joystick / Game Controller

Instructions for Project Submission:

You have to submit three files for your final project: 1) a PDF of the project report, 2) a .dwg file of your drawing, and 3) a PDF image of the 3D model. Only one member from each group will submit those files in Google Classroom.

Structure of the Project Report:**Part 1:**

Description of the geometric units of your drawing. For example, the height, length, radius, diameter, or any other units that you find necessary to mention.

Part 2:

This part should contain a step-by-step description of your drawing. Consider it as a tutorial so that anyone else who will read your project report can draw the same model by following the steps and commands that you have mentioned. Add necessary snapshots during the process and add them to your project. Also, do not forget to add a Cover page.
