

Question 1: The following table shows the number of students enrolled in different engineering branches in a university:

Branch	Number of Students
Computer Science (CSE)	450
Electrical & Electronics (EEE)	320
Civil Engineering	280
Mechanical Engineering	350
Electronics & Communication (ECE)	400

Tasks:

1. Draw a **bar chart** to represent this data.
 2. Draw a **pie chart** to represent the percentage of students in each branch.
 3. Which branch has the highest and lowest enrollment?
-

Question 2: Histogram & Frequency Polygon (EEE Students - Power Consumption Analysis)

The table below represents the monthly electricity consumption (in kWh) of **50 households** in a city:

Consumption Range (kWh)	Number of Households
0 - 50	5
51 - 100	8
101 - 150	12
151 - 200	10
201 - 250	7
251 - 300	5
301 - 350	3

Tasks:

1. Draw a **histogram** to represent this data.
 2. Plot a **frequency polygon** for the given data.
 3. Interpret the distribution: Is it **skewed** or **normally distributed**?
-

Question 3: Histogram & Ogive Graph (Civil Engineering - Traffic Flow Analysis)

The table below shows the number of vehicles passing through a highway toll booth in different time intervals:

Time Interval (Minutes)	Number of Vehicles
0 - 10	10
10 - 20	15
20 - 30	20
30 - 40	25
40 - 50	18
50 - 60	12

Tasks:

1. Draw a **histogram** to represent the traffic flow data.
 2. Draw an **ogive graph** (cumulative frequency curve) for this data.
 3. Estimate the **median traffic count** using the ogive graph.
-

Question 4: Bar Chart & Histogram (CSE - Programming Language Popularity)

A survey was conducted among **1000 software developers** about their preferred programming languages:

Programming Language Number of Developers

Python	300
JavaScript	250
Java	200
C++	150
C#	100

Tasks:

1. Draw a **bar chart** to show the popularity of programming languages.
 2. Convert the data into percentage values and create a **pie chart**.
 3. What percentage of developers prefer **Python**?
-
